

UltraBac Software is celebrating 25 years in business!

Providing the best data protection software, accompanied by unrivaled customer service, has kept us at the forefront of the backup and disaster recovery industry. UltraBac Software continues to be a leader by offering reliable file-by-file and image-based backup products with innovative features. Did you know we were the first company to release backup and disaster recovery software written expressly for the Windows platform? And, who was the first to release TSM, FTP, and virtual-based disaster recovery? UltraBac Software.

These are just some the reasons why we can compete head-to-head with the large multi-product companies and win. Another big reason we come out on top is our focus on relationships. Our customers and resellers are not a number in a database, but respected clients with individual needs. We value your feedback, and believe interaction and the user experience are important. If it weren't for you, we wouldn't be in business. So thank you for helping us reach this landmark year! We couldn't have done it without you.

Thank you!
