

UltraBac Software Presents: The Backup and Disaster Recovery Webinar

Subject: Learn how to install and use backup & disaster recovery software to help insulate your organization against data loss, unbootable failures, and other potential computer related catastrophes.

Hosted by: Judd Williams, Senior Sales Engineer

Date: The Webinar occurs every Wednesday, unless otherwise notified

Time: 8:30am Pacific / 10:30am Central / 11:30am Eastern **and**
10:00am Pacific / 12:00pm Central / 1:00pm Eastern

Webinar Overview:

New and exciting technology has been introduced into the Windows marketplace, allowing for greater flexibility and recovery capabilities than ever before. This information is essential for all organizations who are mandated to, or want to, protect themselves from computer related disasters. Computer data is a significant asset that can cause irreversible harm to a company if lost or made unavailable for even short periods of time. Cost estimates for system downtime range anywhere from \$5,000 per hour to over \$15,000 per minute!

When a server fails, what methods do you have in place to recover? Even a small organization can realize over a 100% return on investment in just a single use of UBDR Gold. Learn how to protect your data with the simplest, most flexible backup and disaster recovery products available – UltraBac and UBDR Gold.

UltraBac Software has designed its backup and disaster recovery software to take full advantage of being a native Windows application. This translates to highly compact products due to very efficient code.

What also sets UltraBac Software's products apart from the bigger brands is our dedication to backup and disaster recovery. It is our only business, so complete focus is on continually providing the most optimal solutions for protecting your information. We understand the importance of your data and know that unnecessary downtime not only costs money but, in the worst-case scenario, can drive a company out of business.

Learn how UltraBac and UBDR Gold can ensure the future of your organization.
