ULTRA**BAC**™
SOFTWARE

USERS OF: TSM MS VIRTUAL SERVER SAN WINDOWS FTP VMWARE

These People Are Jumping For Joy Because:

a. They are using a Windows-based Bare Metal Recovery (BMR) product that can also be 100% integrated with IBM's Tivoli Storage Manager.

b. They are leveraging their disaster recovery investment using TSM, NAS/SAN, network, tape, library, FTP, etc.

c. They have true dissimilar hardware restore capability.

d. They can perform virtual-based disaster recoveries using VMware or MS Virtual Server 2005.

e. They can use IBM Global Services (or any other service for that matter) to easily recover critical Windows servers that have been physically destroyed.

f. They can fully recover a failed server to 100% operational status in 15 minutes or less.

g. **All of the above.**
   They discovered UBDR Gold bare metal disaster recovery.
